XSTONE EFFECT LLC · CAPABILITY STATEMENT

Agentic AI platforms for firms that sell expertise.

XStone Effect is the engineering partner that builds a firm's own agentic AI platform end to end, and documents every step so that clients, funders and auditors can check it.

Legal name	XStone Effect LLC
Location	Pensacola, Florida, USA
Contact	info@xstone.tech
Markets	Europe, the Middle East and the United States

Four capability areas

Orchestration core

Agents that take on delegated work, keep their context, call any major model through one gateway and act under their own signed identity.

Intelligence modules

Predictive crisis simulation, hyper-personalized media pitching, and search and AI-search strategy monitoring.

Security, Web3 & financial governance

Second-factor sign-in, wallet sign-in, multisig approvals, multi-currency balances and audit trails for when agents touch money.

Integration & automation

Connections to your CRM and CMS, automation of repetitive media and strategy work, and a dashboard where strategists approve what the platform proposes.

How we deliver

Code in your repository from day one · Hours logged per task · Independent review of every change · A failing test for every security control · Acceptance against a written test for each deliverable.

TASK-LEVEL CAPABILITIES

Twenty task-level capabilities

#	Capability	Area
1	Multi-agent logic controller and task delegation	Orchestration core
2	State management for long-running digital interactions	Orchestration core
3	Prompt engineering and context persistence	Orchestration core
4	Prompt-injection security and sanitization middleware	Orchestration core
5	Abstraction layer for OpenAI/Anthropic model switching	Orchestration core
6	Content-scaffolding automated data pipeline	Orchestration core
7	Persona generation and sentiment data integration	Intelligence modules
8	Monte Carlo simulation for public-reaction modeling	Intelligence modules
9	Journalist data mining and historical pattern analysis	Intelligence modules
10	Relevance and sentiment-based pitch scoring	Intelligence modules
11	Autonomous SERP tracking and competitor footprint agents	Intelligence modules
12	Real-time information synthesis for strategic insights	Intelligence modules
13	MFA and authentication layer	Security, Web3 & financial governance
14	Web3 authentication and wallet connector	Security, Web3 & financial governance
15	Multisig transaction logic	Security, Web3 & financial governance
16	Multi-currency balance engine	Security, Web3 & financial governance
17	Audit trails and compliance logging	Security, Web3 & financial governance
18	CRM/CMS data synchronization and secure webhooks	Integration & automation
19	Automation of repetitive media and strategy tasks	Integration & automation
20	Dashboard UI/UX for automated strategy validation	Integration & automation
